

*Dr. Carey Robertson, CUCC's principal organist, hosted two classes of Early Childhood Center students on a "field trip" to visit our Sanctuary organ. Three- and 4-year-olds from the Rainbow and Teddy Bear Rooms sat around the organ while Carey demonstrated the organ's range of sounds; played a couple of songs, including Twinkle, Twinkle, Little Star; and showed the children her special organ-playing shoes. As the children left the sanctuary, Carey let them hear the organ at its loudest, which was pretty exciting for people their age, who know a little*

*something about being loud.*
