

September 2009

Dear ECC Families and Caregivers,

I know that the majority of our ECC students receive their flu shot each year, and I am assuming that these children will also receive the upcoming swine flu inoculation, as well. Due to the recent governmental report warning that 30,000 to 90,000 additional deaths (in addition to the 36,000 annual deaths from the flu) could result from the swine flu, ECC is recommending that all adults who spend time on our campus also consider receiving the inoculation, as well. We, of course, are not making this mandatory, and completely understand that there are religious/personal beliefs that may come into play here. Please understand that this is just a recommendation due the possible overall infection to the vulnerable population of ECC.

Thank you for your understanding!

Kristy Knight, Director
Early Childhood Center
